QuickDry system and weather proof

Our QuickDry system allows for a collection of comfortable furniture with the feel and look, you would normally only see indoors but with all the features of weather resistant outdoor furniture. After exposure to rain or dew, place the cushions in an upright position, so water and moisture can escape easily. To ease cleaning, we recommend the furniture to be stored under our covers in winter or when not in use for longer periods of time. Essential when storing tex[®] and soft-touch[®] furniture inside or outside is good air circulation and the ability for water and moisture to be able to escape. All furniture and fabrics/cushions can be cleaned with water and ordinary household cleaners using a middle to hard brush. For more information regarding maintenance and cleaning: www.cane-line.com.

low maintenance

With spaces under the open sky, low maintenance furniture is an asset value in itself. Our Cane-line QuickDry technology allow cushions to dry shortly after a downpour. From design to materials selection, all Cane-line furniture is produced to live long. The furniture works in all weather conditions all year and is very easy to clean just with water and ordinary household cleaners.

QuickDry system 

90% of rainwater is repelled, whereas only 10% passes through the cushion
